DETAILED ACTION

The preliminary amendment filed 1/12/04 has been entered.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-13, 19-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the preliminary amendment filed 1/12/04, claims 1 and 14-18 were canceled.

However, claims 2-13, and 19-22 are directly or indirectly dependent from claim 1 and as such cannot be examined.

It appears that claims 17 and 18 are directed to Figure 6 but the claim they depend from namely claim 14 is directed to Figure 5. This mix matching of Species makes the claims indefinite.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(f) he did not himself invent the subject matter sought to be patented.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 23-30 are rejected under 35 U.S.C. 102(e) and (f) as being anticipated by Munk et al. (US 6746182).

Munk et al. discloses claims 23-26 (see Figs. 2,7), claims 27-30 (see Figs. 6,7). It should be noted that US pat. 6746182 do not have the same inventive entity as this application (10/755,521). Furthermore, US pat. 6746182 and this application (10/755,521) do not appear to have the same assignee.

5. Claims 27-30 are rejected under 35 U.S.C. 102(e) and (f) as being anticipated by Pallini, Jr. et al. (US 6422791).

Pallini, Jr. et al. discloses claims 27-30 (see Figures). It should be noted that US pat. 6422791 do not have the same inventive entity as this application (10/755,521).

Furthermore, US pat. 6422791 and this application (10/755,521) do not appear to have the same assignee.

Art Unit: 3673

6. It should be noted that upon applicant's clarification of what claims should be examined, it appears that a restriction requirement at that time would be proper. There are six Species, starting from Figs. 2-7, each one of said Figure corresponding to a particular Specie.
